About This Content

LOSE YOUR MIND. EAT YOUR CREW. DIVE.

Take the helm of your submarine and set sail for the unknown! Zubmariner is the first expansion to Sunless Sea: deeper, darker, and more marvellous than anything you've seen before.

All the powers of the Neath agree: there is Nothing of Consequence beneath the Zee. They are lying. You've heard there are fortunes to be made by those brave enough - or hungry enough - to dare the deeps.

Disturb the aberrant societies that flourish in the dark. Defy wreckers. Seduce a Drownie. Embrace or condemn the distinctly un-British customs of these cold, fathomless places.

You will definitely die. Will your next captain dive?

Considering the fact that I paid \$10 of REAL money I expected to be able to jump right in to my new submarine. Nothing of the sort. First you have to travel down all the way to the bottom of map then you have to travel AGAIN just to find the componenets for it in the center of the map, and fund it with IN GAME money. And permadeath to the mix and you realize you've just lost hours of grinding for something you paid for up front.
